1 PROJECT DESCRIPTION

NSJWCD holds water right Permit 10477 to divert water from the Mokelumne River at specified points of diversion and use that water within the NSJWCD place of use.

Landowner Borra has an existing riparian river pump on north bank of Mokelumne River just upstream of Elliott Road that is a short distance from the NSJWCD existing North Pump Station. The North Pump Station is an authorized point of diversion under Permit 10477.

NSJWCD is requesting that the State Water Board add the existing Borra river pump as an additional point of diversion to Permit 10477 to enable water available under Permit 10477 to be used to irrigate existing cropland in the currently authorized Permit 10477 place of use.

Diversion rates and season from the existing Borra pump will be within the range of historical operations. No construction anticipated. The Borra pump is existing and has an existing fish screen. Borra may add a new fish screen and will submit a notification to Dept. of Fish and Game accordingly.

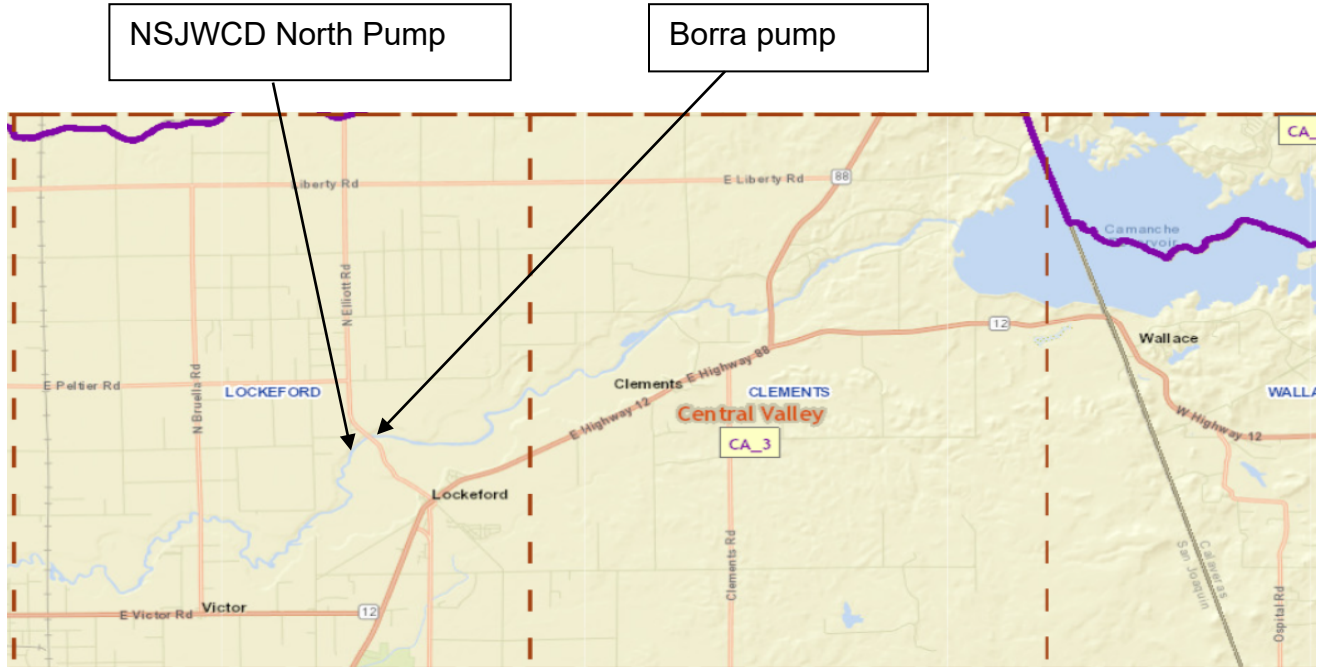

Permit 10477 water diverted at the Borra pump will be used to irrigate non-riparian lands that are otherwise irrigated with groundwater, thus diversions will increase in-lieu recharge and decrease groundwater overdraft in the district.

Objective

The objective of this project is to reduce groundwater overdraft by diverting permit 10477 water from an existing riparian pump station.

Project Location

The Borra pump is located on the north side of the Mokelumne River, just upstream of the Elliott Bridge, east of Lodi and just north of the community of Lockeford. The Borra Pump is immediately upstream of the location of the existing NSJWCD North Pump Station.

Project Facilities

No new facilities will be constructed. The Borra Pump is an existing facility that has historically been used to divert water from the river for irrigation of adjacent riparian lands. If the minor change is approved, the Borra Pump will also be used to divert water available under the NSJWCD Permit 10477 water right to irrigate adjacent non-riparian lands that are currently irrigated with groundwater.

Required Approvals

The State Water Resources Control Board must approve this minor change to Permit 10477.

2 Initial Study

The following Initial Study, Environmental Checklist, and evaluation of potential environmental effects (see Section 3) were completed in accordance with Section 15063(d)(3) of the State CEQA Guidelines to determine if the proposed project could have any potentially significant impact on the physical environment.

An explanation is provided for all determinations, including the citation of sources as listed in Section 4. A "No Impact" or "Less-than-significant Impact" determination indicates that the proposed project would not have a significant effect on the physical environment for that specific environmental category.

DETERMINATION:

On the basis of this initial evaluation:

I find that the proposed project COULD NOT have a significant effect on the environment, and a NEGATIVE DECLARATION would be prepared.

I find that although the proposed project could have a significant effect on the environment, there would not be a significant effect in this case because revisions in the project have been made by or agreed to by the project proponent. A MITIGATED NEGATIVE DECLARATION would be prepared.

I find that the proposed project MAY have a significant effect on the environment, and an ENVIRONMENTAL IMPACT REPORT is required.

I find that the proposed project MAY have a "potentially significant impact" or "potentially significant unless mitigated" impact on the environment, but at least one effect 1) has been adequately analyzed in an earlier document pursuant to applicable legal standards, and 2) has been addressed by mitigation measures based on the earlier analysis as described on attached sheets. An ENVIRONMENTAL IMPACT REPORT is required, but it must analyze only the effects that remain to be addressed.

I find that although the proposed project could have a significant effect on the environment, because all potentially significant effects (a) have been analyzed adequately in an earlier EIR or NEGATIVE DECLARATION pursuant to applicable standards, and (b) have been avoided or mitigated pursuant to that earlier EIR or NEGATIVE DECLARATION, including revisions or mitigation measures that are imposed upon the proposed project, nothing further is required.
